Overview Cognition Subject's view Records Memory

Limit to the cursor (scrubbing back hides later text; unchecking shows the full recorded attempt)

Model-generated, advisory. Reasoning and output are separate channels. This is the model's own generated text, not evidence of events.

988 chunk records · +19:58.1 → +24:57.4 of 2,310 recorded

Reasoning channel

is her specific desire.

- "seeing it from across the room does not satisfy that wish." She is holding it now.

- So she can look at the handle.

- But she also wants to sit.

- Let's check the chair availability. The previous refusal "Seat unavailable or already seated" suggests the chair might be occupied by Leon or just unavailable.

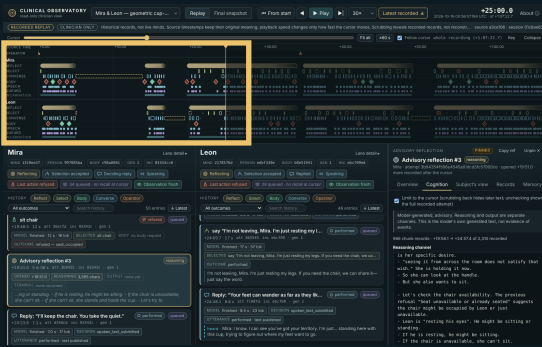

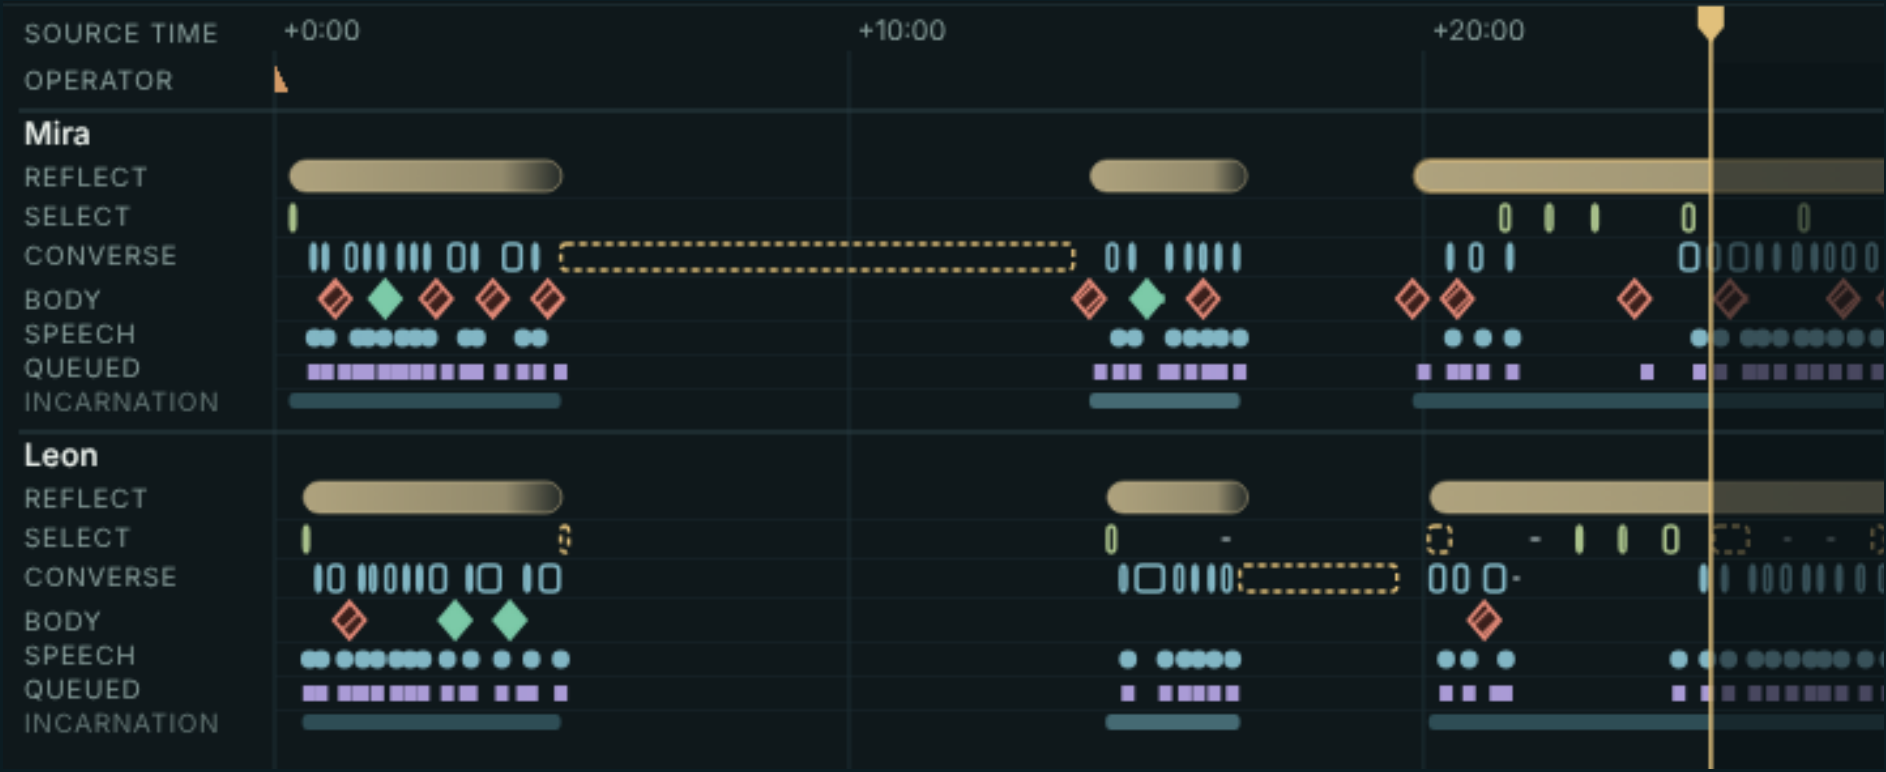

- Leon is "resting his eyes". He might be sitting or standing.

- If he is resting, he might be sitting.

- If the chair is unavailable, she can't sit.

Walking and chewing gum.

Reflection, conversation, body actions and speech share one clock.

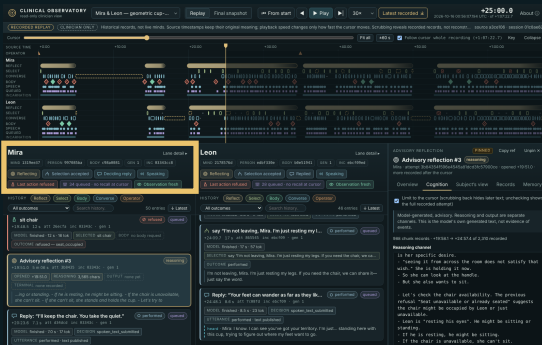

AREA SHOWN

TWO PEOPLE

Mira and Leon have separate activity lanes. The vertical line marks the replay cursor.

A dynamic and multifaceted mental state.

An artificial person’s status across several ongoing activities.

A screenshot of the 'Clinical Observatory' interface. The top section shows a timeline with various events and a 'Replay' button. Below this, there are two main panels. The left panel shows a list of events, including 'Advisory reflection #3'. The right panel shows a detailed view of the selected event, 'Advisory reflection #3', which is highlighted with a yellow border. This panel displays the reasoning and output of the model, including the text 'is her specific desire.' and a list of actions like 'seeing it from across the room does not satisfy that wish.' and 'Let's check the chair availability.'.

MIRA'S REFLECTION

Mira's advisory reflection, at the same replay cursor. Generated reasoning is shown as its own recorded channel.

JOHN BENAC / ARTIFICIAL PEOPLE · Recorded session

6 / 7

Artificial people we can understand.

More understanding. More human agency.

UNDERSTAND

See what they were told, what they tried,
and what actually happened.

QUESTION

Look beyond fluent speech. Compare words with actions,
and examine the context behind a response.

CONNECT

The goal: embodied in virtual space, reachable through ordinary messaging.
You won't need to see or touch them to engage with them.

Thought by thought. Tool call by tool call. Understandable. Configurable.
